PROFESSIONAL SUMMARY

Entry-level **Full-Stack Web Developer** skilled in **React.js, JavaScript, Node.js, Express.js, MongoDB, REST APIs, and JWT authentication**, with hands-on experience building and deploying full-stack web applications. Seeking a **Web Developer, Full-Stack Developer, or Software Engineer** role to contribute to building reliable and user-focused web products.

EDUCATION

Institute of Engineering and Technology, DAVV	Indore, MP
<i>B.E. in Electronics & Telecommunications</i>	2021 – 2025
Maharishi Vidya Mandir	Chhindwara, MP
<i>Class XII (CBSE) – 84%</i>	2021
Maharishi Vidya Mandir	Chhindwara, MP
<i>Class X (CBSE) – 87%</i>	2019

PROJECTS

TaskFlow – Full-Stack Task Management Platform <i>React.js, Node.js, Express.js, MongoDB, JWT</i>	Sep 2026
– Architected and deployed a full-stack task management platform using React.js, Express.js, MongoDB, and REST APIs, with 17 API endpoints supporting task tracking, calendar organization, monthly goals, authentication, and user preferences. – Secured the application’s REST API endpoints using JWT authentication and bcrypt password hashing, implementing protected routes, persistent session management, and strictly user-scoped data access. – Built CRUD workflows for tasks and calendar entries with status, priority, due dates, descriptions, notes, pinned items, and marked dates, backed by persistent MongoDB data models. – Designed reusable, responsive React components for task filtering, dashboard progress visualization, calendar navigation, monthly goals, profile management, and notification preferences across the application. – Added backend input validation, ownership checks, protected API middleware, and environment-based configuration; deployed the application using Vercel, Render, and MongoDB Atlas. – Live: taskflow-chi-jet.vercel.app GitHub: github.com/Anti-sin/TaskFlow	
Developer Portfolio <i>React.js, Vite, Tailwind CSS, JavaScript, GSAP</i>	Sep 2026
– Built a responsive developer portfolio using React.js, Vite, and Tailwind CSS with client-side routing, reusable components, and accessible navigation across dedicated project and service pages. – Developed custom GSAP animations for interactive hero experiences and scroll-based transitions, plus a Component Lab for frontend experimentation and reusable UI patterns. – Structured the application with reusable, data-driven components across projects, services, process, plans, about, and contact sections, separating content from presentation logic. – Live: portfolio-ruby-zeta-efph5h7wsc.vercel.app GitHub: github.com/Anti-sin/portfolio	

TECHNICAL SKILLS

Languages: C++, JavaScript
Frontend: HTML5, CSS3, Tailwind CSS, React.js, Responsive Web Design
Backend: Node.js, Express.js, REST APIs, JWT Authentication
Databases: MongoDB, MongoDB Atlas, SQL
Tools: Git, GitHub, Postman, VS Code, Vercel, Render
Core: Data Structures & Algorithms, Problem Solving

ACHIEVEMENTS

- **LeetCode:** Solved **300+ problems** with a **1556 maximum rating**, spanning arrays, dynamic programming, trees/graphs, and greedy algorithms.
